

CREWS AND TRACK TEAM SET FOR CONTESTS

SPORTS PEP SESSION WILL BE HELD TODAY

BOWDOIN TRACK AND FIELD FORCES ARE FAVORED TO WIN NEW ENGLAND CHAMPIONSHIP

BEAVERS AND B. C. HAVE FAST TEAMS

Technology Power in Running Events May Cause Big Upset

Today and tomorrow the Institute track team is competing in the New England Intercollegiate, held at Bowdoin College, Brunswick, Maine. Nineteen men made the trip yesterday with Coach Hedlund and Trainer Johnson in hopes of duplicating last year's victory, most of the Cardinal and Gray point winners of last year being eligible for competition this year.

According to a prediction made by Coach "Os" Hedlund, the fight for first place is sure to be between Technology, Maine, Bowdoin, Boston College, and Holy Cross this year. "Os" has been pretty accurate in his advance dope this year, his prediction on last Saturday's meet with Holy Cross falling within five points of the final result.

Last year Technology was host to the athletes in the New England's and took first place in a very inhospitable manner. It being Bowdoin's turn to do the same this year, quite a few sports writers are looking for the cup to remain in Brunswick after this week. One thing is certain, and that is, that should Technology cop the honors again, it has been unofficially decided just how the cup will be dedicated. Further particulars will be announced later.

The Technology men include Captain Steinbrenner in the hurdles, Wiebe in the century and broad jump, Smith and Fay in the half-mile, and Hallahan and Meagher in the 440. Three weight men, Stachelhaus, Martini, and Glantzberg, are expected to place high in the finals, and Miles Gray will throw the discus with the best of the competition. Kirwin, Mitchell, and Worthen, the "one-two-three" milers, and McClintock and Austin, two-milers, are the entries in the long-distance events. Earle in the broad jump, Brockelman in the high jump, Ray Jack in the pole vault, and McCarthy throwing the javelin, conclude the list of potential point-winners.

Over 600 Degrees Will Be Awarded At Commencement

18 Doctors' and 165 Masters' Degrees Await Outcome Of Term Marks

Approximately 625 degrees will be awarded at this year's commencement, it was announced yesterday at the office of the Secretary of the Faculty. This figure is, however, subject to revision following the June examinations, it was stated, and it is possible that the figure for the Bachelor of Science degrees may be appreciably lowered.

Of this number, approximately 440 will be the degrees of Bachelor of Science awarded to members of the Senior class, while about 165 will be degrees of Master of Science. It is also expected that ten degrees of Doctor of Philosophy will be awarded, together with seven Doctor of Science, one Doctor of Public Health, and six degrees of Master of Architecture. One Certificate of Public Health will be given. Of the total number, there are only four co-eds, three as candidates for the degree of Bachelor of Science, and one as a candidate for the degree of Master of Science.

In Charge of Today's Sports Mass Meeting

Homer A. Burnell '28

M. I. T. A. A. HOLDS AWARDS BANQUET

President Stratton Addresses Group on the Value of Athletics

Awards to all the winter sports teams, and to the winners of the various events in the Handicap and Inter-class meets, besides various special cups were given out at the annual M. I. T. A. A. awards banquet which was held in North Hall, Walker, on Wednesday at 6 o'clock. Dr. John A. Rockwell '96, chairman of the Advisory Council on Athletics, presided and presented the awards.

Several of the men received two of the cups awarded as prizes for the track meets, and one, Norman E. Earle '29 took three. Cups were awarded to the members of the Rifle Team in order of their year's scoring, the first prize going to Robert M. Harbeck '28, who this season captured the Intercollegiate Marksman Championship. In addition the Fencing Club gave several cups to be competed for, but only the one for most improvement was presented.

Stratton Stresses Fair Play in Talk

Following the presentation of cups, President Samuel W. Stratton gave a short talk in which he said he believed that athletics were very nearly as important as school work in the development of character, stressing the function of competition and fair play.

Dr. Rockwell then presented the shing'les to the members of the various winter sports teams. These included the Basketball, Hockey, Gym, Fencing, Soccer, Cross-Country, Wrestling, Rifle, and Swimming Teams. This was followed by the presentation of "Straight" T's, starred T's, and finally Ernest C. Hinck '27, captain of this year's basketball team was awarded a T with two stars, denoting that this is the third year in which he has won the "Straight" T.

When dinner was over the meeting adjourned to room 5-330, where sports moving pictures were shown. These included reels of the last Oxford-Cambridge-Harvard-Yale track meet, besides those of Technology teams in action, M. I. T. track meets, crew races, and Field Days.

ASK ATTENDANCE OF ALL AT MASS MEETING AT NOON

Will Hold Pep Session Before
Crew Regatta—Coach
Haines to Speak

BAND WILL BE PRESENT

In the first sports mass meeting that has been held since last fall, speeches will be made in the Great Court from 11:50 until 12:10 o'clock by Coach William Haines of the Institute crews, Orville B. Denison '11, and others. President Samuel W. Stratton has given permission to cut five minutes from both the 11 o'clock and 12 o'clock classes for the purpose.

This mass meeting is being held as a sort of "pep" session before tomorrow's crew regatta, tennis match, and the New England's. Coach Spoon of the Pennsylvania crew, together with his varsity crew, and Coach Haines of Harvard, the representatives of the other principals in the triangular crew regatta, are expected to be present, and the two coaches will give short talks if they are able to come.

Since the New England's are being held at Bowdoin this year, the team left last night, and therefore no representatives of that sport will be present officially. The second varsity and freshman tennis teams meet Andover tomorrow.

Flyers will be distributed to students all over the Institute today to insure a full attendance. There will be a band present to arouse enthusiasm by its playing, and Albert L. Eignebrot '29, cheer leader, will lead the cheering. The whole meeting will be under the auspices of the Technology Calumet Club, and Homer A. Burnell, Jr. '28 of the Club, will preside.

DATE SET FOR "TECH NIGHT" POPS CONCERT

Special Program is Planned for
Evening of June 3

"Tech Night at the Pops" is scheduled this year for Friday, June 3. This is the annual occasion for Alumni and all undergraduates to attend the Pops together in Symphony Hall and spend an enjoyable evening.

A special Tech program will include numbers by the M. I. T. Saxophone Quintette, unison singing of college and popular songs and probably a few selections by the Glee Club. Elisha Lee '92 will present the permanent class banner to James A. Lyles, newly-elected permanent President of the Class of 1927, at this time.

Tickets will be on sale next Monday, Tuesday and Wednesday from 12 to 2 o'clock in the Main Lobby, or may be secured from members of the Senior Week committee. The assessment is \$1.50 apiece on the main floor, where refreshments will be served, and \$1.25 in the balcony.

DORMS STAGE FINAL DANCE THIS EVENING

Technology's Dormitories will stage a semi-formal Dorm Dance tonight from 8 until 1 o'clock in North Hall, Walker. This affair is the last Dormitory social event of the season. Mrs. James R. Jack and Mrs. Leonard M. Passano have consented to act as chaperones for the dance, and the Techonians have been secured to supply the music. The price of the tickets has been set at \$2.50, and the distribution is being effected through the Dormitory office and the Dance Committee.

CALENDAR

Friday, May 20
11:50—Mass Meeting, Great Court.
5:00—T. C. N. Slaughter, Baseball Field.
5:30—Fencer's Club Meeting, North Hall.
9:00—Semi-Formal Dorm Dance, North Hall.
Saturday, May 21
3:00—Crew Regatta, Charles River Basin.
Monday, May 23
5:00—Christian Science Society meeting, Room 4-132.

HARVARD EIGHT IS SLIGHT FAVORITE IN REGATTA ON CHARLES RIVER TOMORROW

Takes Leadership Of Institute Committee

Ralph T. Jope '28

NEW COMMITTEE ASSUMES CHARGE

First Official Act Taken Is
Election of Officers For
Coming Year

Holding their final meeting of the year yesterday evening the members of the Institute Committee in power during the current school year gave up their seats to those who will be in charge of Technology undergraduate life during the year of 1927-28. Officers elected on the new Institute Committee were Henry B. Dean '28, Vice-President, Elisha Gray '28, Secretary, and Thomas S. Wood '28, Member-at-Large of the Executive Committee. Ralph T. Jope '28, President of the Senior Class is President of the Committee.

Constitution Changed

Continuing the former custom the meeting was held at the home of President Samuel W. Stratton and was followed by an informal dinner. Action taken by the old Committee before retiring was featured by the ratification of numerous changes in the constitution as presented by Edward D. True '27, chairman of the committee on constitution revision. Few major changes were made, the most drastic innovation being the revision of the rules governing the rules on attendance by proxy.

According to the revised constitution any organization having a member on the Institute Committee who is guilty of two absences and one proxy or two proxies and one absence in three consecutive meetings will lose its representation on the Committee. The only other major change was the defining of the function of the Field Day Committee as a sub committee of the Institute Committee.

Technology organizations which lost their Institute rating by not having turned in constitutions to the Institute Committee before this meeting included Vectors, The Colonels, Trigllyphs, Chauncey Hall Club, British Empire Club, Japanese Club, and Norwegian Club. Henry B. Dean '28 was elected chairman of the Elections Committee, and John J. Hartz '28 was chosen chairman of the Points System Committee. Homer A. Burnell '28 automatically became chairman of the Budget Committee through his election as treasurer of the class of 1928.

FOUR TECHNOLOGY CREWS WILL RACE

Harvard and Yale Classes Will
Open Regatta At
3 O'Clock

Tomorrow afternoon the most important event in this season's crew schedule will take place on the Charles River when Harvard, Penn, and Technology compete in a regatta which will consist of varsity, junior varsity, 150-pound varsity, and freshman races. Two other races are also scheduled for the afternoon; these will be between Harvard and Yale class crews. These two Harvard-Yale events are scheduled to start at 3 o'clock. The other races will follow at about half hour intervals if the weather is favorable. The distances for the varsity, junior varsity, and freshman races will be one and three-quarters miles. The light varsities will race over the Henley one and five-sixteenths miles course.

Harvard Is Favorite

Judging from the results of this season's varsity races of the three competitors, it would seem that Harvard should be able to nose out the Beavers, who in turn should win from the Penn eight. Harvard's only race of this season resulted in a one-length defeat by the Navy. Penn has lost by considerable margins to Navy, Yale and Columbia. Early in the season Technology lost to Navy by three lengths, but the other race of the season resulted in a decisive victory over Princeton. In the Jayvee race the Beavers are expected to be the underdogs for both the Harvard and Penn light varsity crews are considered almost as strong as the varsity boats.

It is hard to predict the result of the 150-pound race as this will be Harvard's first clash; and Penn's only race of this season was with the Navy crew which she defeated. This does not mean a great deal though for the Navy 150-pound eight have never been very strong. The freshman have improved greatly since they were overwhelmed by Princeton two weeks ago as their

(Continued on Page 3)

Choose Company A As Best Unit Of Freshman Cadets

Lindroth Wins Gold Medal for
Individual Proficiency in
Annual Contest

First prize for individual proficiency in freshman military training was awarded to Lambert S. Lindroth, D Company, in the competition held yesterday by the Technology Battalion of the R. O. T. C., while second and third prizes went to David Landen, Company B, and Milton Mezikofsky, A Company, respectively. Company A was judged the best-drilled Company and Battalion Sergeant-Major Joseph Harrington Jr., '29, won the saber as the best trained non-commissioned officer.

Competition for the company prize centered around companies A and C. After some deliberation the judges awarded first place to Company A, giving C Company honorable mention. As a reward, Company A will carry the new pennant, recently presented to the Battalion by the Reserve Officers' Association, at the annual general military review, next Wednesday.

PROCRASTINATION

WITH the closing of another school year there naturally remain many little matters which should be cleared up before the final examinations commence. One of the most important of these duties is to return the books which have been "borrowed" from the Walker Memorial Libraries.

We do not pretend to understand how or why these books have disappeared nor are we prepared to hazard a guess as to the exact number of volumes which are missing at present, but we do know that this number is rather large.

It is rather discouraging for the authorities to run a library in which little attention is paid to the return of books. We understand that it is possible to take books from the library provided that each volume is signed for. We also understand that a number of books are taken without having been signed for. Doubtless it is not the intention of these borrowers to actually keep the books, but forgetfulness and procrastination have, in the past, been responsible for the permanent disappearance of more than a few volumes.

It is for this reason that we make mention of such a fact at this time. It is not too soon to return the books that are missing. We feel sure that the spirit of fair play is bound to enter into the matter. The Walker Libraries are intended to be of benefit to the whole of the student body and not merely to a select few. It is only by co-operation that the Library can be made to amount to anything, and we ask that you do your share by returning now whatever books you may have at home.

STUDENT SUICIDES

THERE seems to be a very definite movement in the press to exaggerate, and over-emphasize the faults of the modern college man. In practice this movement takes many forms; but one of the most serious, both in effects and in intimations, is the matter of student suicides.

We do not deny the seriousness of the situation—it is one which may well cause us deep concern. But the particular phase of the subject which we most strongly object to is the inordinate publicity which is accorded such matters. To boldly and flagrantly capitalize these cases and broadcast the news to a mob eager for the morbid, sordid things of life is not only an insult to the rest of the college world, but is a crime against the youth of today.

Suicide of any kind is the result of an attitude of mind. While the physical heroism necessary for suicide might be acquired, nothing on earth can teach the mental and moral cowardice which are necessary for its accomplishment. Therefore the conclusion may be fairly drawn that there is nothing that can lead a man to suicide, but there are many things which can keep him from it.

It is in this last field that the rest of the world can labor. It is for this reason that the newspapers and journals of the time are doing us an injustice through their tendency to over-emphasize and exaggerate. Recent statistics have shown that the number of student suicides is actually no larger now than it has been in years past but that each particular case receives nation-wide publicity. This publicity can only reflect unfavorably on America's student body.

1XM Radio Transmitting Equipment Rebuilt Several Times This Year

Merits of Different Hookup Data Obtained Through This Procedure

Living up to its reputation of being an experimental station, the Radio Station 1 XM has had its transmitting equipment rebuilt many times during the past season. Data as to the relative merits of different hookups has thus been obtained.

A push-pull 200 watt transmitter started the season off as the No. 1 transmitter. Later the number one was changed to a coupled Hartley circuit using one 250-watt tube. This circuit was invented by Mr. R. V. L. Hartley, a recent speaker at a Colloquium of the Electrical Engineering Department.

Wave Bands Crowded

Amateur wave bands have become nearly as crowded as broadcast bands and so it was decided to build a transmitter capable of operating on any short-wave band. 1 XM is one of the few stations having consistent message traffic with South Africa direct and it is necessary for such long distance work to be free from "jamming" by nearer stations whose signals are louder.

A tuned-grid, tuned plate transmitter was therefore built using plug in coils. This permits operation on 20, 40, 80, and 160 metres with present coils and all that is needed for any other wave is to plug in coils of the right size for that wave. Experimentation on a wave length of five meters will be carried on this summer using this transmitter.

Two Radio Society members are going North with MacMillan this summer and they expect to keep in constant communication with their friends at M. I. T. Summer Session through 1 XM.

Uses Vertical Antenna

A vertical antenna, which the M. I. T. Communications Division has discovered to be the most efficient short wave radiator, is now in use at the station for 20 meter work. A horizontal antenna is also available for use on 40 meters and with the Standard Frequency transmitter which will be operated on a dozen widely separated waves in the course of an evening.

This latest transmitter uses a De Forest 250 watt tube, plate supply being through a Kentron unit. This supersedes the old "S" tube rectifier formerly operated with the No. 1 transmitter. Optional plate supply can also be obtained from a motor generator unit furnishing 1200 volts D. C. or from a mercury arc rectifier.

Men interested in experimentation with transmitting or receiving equipment find an exceptional opportunity for personal or joint research at the station as it was planned for just this type of work. The membership of the Radio Society operating the station is not confined to Course VI men; Courses X, XV and others have several representatives.

As We Like It

KATJA

Katja comes to Boston and the Shubert Theatre after a two years' run in London and an extended stay in New York. It is an operetta in three acts and is based on an old plot which has a tremendous appeal abroad. The main plot involves Katja Karina, the exiled Princess Hanoff and Prince Carl on whom the burden of responsibility for her sufferings has been placed. Both Madeline Collins and Leonard Ceeley as the Princess and Prince sing very well.

The sub plot which looks very much like an American addition is extremely clever and makes the entire production far more entertaining. Jack Sheehan as Leander Billedork provides such a thread of merriment and real genuine comedy with Doris Patson as Patricia that they were recalled again and again.

The dancing was extremely clever and diverting throughout. Volodia Vestoff and Martha Mason are both accomplished in their art. The outstanding musical numbers are "Leander," "I Fell Head Over Heels in Love" and "Just For Tonight."

Katja is a good evening's entertainment, although it comes far from being a perfect production. The cast is rather weak and the quick changes from comedy to heavy drama are a bit annoying; but the music is good, the dancing enjoyable and the comedy of Leander and Patricia supreme.

About the only way t. e. n. seems to be able to make itself heard is by using some means of inflation or magnification—for even the smallest flea microscope. (ref., Prof. Drisko.) First the board tries to exalt itself by means of the enormity of THE TECH's baseball score, and then it hooks up outside Walker the loudest squawker available in an attempt to let the world know that its sales aren't going as well as they might. The noise next to the Lounger's office door all yesterday afternoon reminded him so much of the t. e. n. board that he was forced to go out finally and disconnect the wires. He suggests though that t. e. n. leave the broadcasting station up to announce the runs THE TECH will continue to make this evening beginning promptly at five.

Speaking of advertisement, it is remarkable that no one else has discovered the secret of the A. A.'s success. For at least four or five decades now that worthy organization has had at a very small rate—too small—the entire advertising space in the Lounger's calendar (see Fig. 1 in cut at head of this column) and what could be more far-reaching or better trusted than the Lounger's endorsements? But the sad part is that nary a cent of the very small rate has the Lounger received during the whole time. He would feel entirely justified were he to change the ad to any of the other worthy organizations—the Menorah Society, or even the T. C. A.

That a good athlete can eat was ably shown at the M. I. T. A. A. banquet the evening before last, when any number of stalwart men came around, dined, collected their letters, and then left so as not to interfere with the showing of the movies which the association had planned for them. Nice boys, these athletes!

The Lounger wasted a few minutes the other day watching some of the horseshoe fiends bowling in Eddie Pung's back alleys. It was astounding what distance some of the young hopefuls could get before the first bounce. For all the difference it would make to them, Eddie might just as well have made his alleys only half as long and let his patrons pitch from out in the hall.

THE TECH BOOK LIST

STUDENT LIFE IN PARIS

MORNING, NOON AND NIGHT, Kenneth Phillips Britton. Hartford, Conn., Edwin Valentine Mitchell. \$2.00.

Morning, Noon and Night, a "Vanity Fair" type of novel is the first production of this publisher. The author's frankness, his up-to-minute lines of a college youth, make the novel very interesting. Everyone will want to read it, when it becomes known that

the author's purpose of this book is to portray the kind of a life that a young lady should not indulge in, in order that she may spend her aged years in peace and happiness. In reading the book, however, it seems that the character was first devised and then the purpose deduced from the actions of the character. As a matter of fact, character predominates throughout the entire volume.

Marellen Bellew is the young lady that we are to scrutinize carefully and then heed the lessons that she gives us. She is the type, "who-never-take-a-dare," but is kept from being dared by an invalid mother. Finally, she is released from her recluse, given plenty of money by a deceased brother, goes off to Paris at the age of 35 to make up for lost time. There she is completely rejuvenated by a Parisian beauty specialist, and tutored in the elements of the "fast set" by a Wellesley graduate. She proves to be an exceptional pupil and soon shows up her instructor, for she becomes the leading lady on the stage of the American Colony in Paris. She goes through all the thrills and sensations of a 20 year girl just out of college and in Paris with the rest of the American students. One summer of this life is enough for her, she returns to Boston.

Mr. Britton must have recently graduated from college or perhaps is in some way connected with the undergraduate life of the college youth for his volume well characterizes the college youth. He understands him thoroughly. His descriptions of life in the American Colony is an advance idea for the weekly publications to work on. As far as structure goes there are no commendations to make; it seems that the author has left that to take care of itself, for that reason the ending of the novel is a disappointment to the reader. However, his frank attitude and his thorough knowledge of the life of students in Paris and his very up-to-minute youthful ideas make the volume worth while.

HARVARD'S VARSITY EIGHT IS FAVORED

Two Cardinal and Gray Tennis Teams Overwhelmed by Crimson

TECHNOLOGY FROSH AND VARSITY LOSE IN TENNIS MATCHES

Down Amherst Racquet Team 4-2—Freshmen Battle Andover Today

Smashing through its schedule, the varsity tennis team added another win to its score Tuesday afternoon by cleaning up Amherst four to two. Captain Ernie Hinck took the first match in two sets and set an example that the rest of the team followed in allowing the Amherst team only one of the singles and one of the doubles.

Playing a good game all the way close results featured the rest of the singles. Kononoff pushed his opponent to two eight-six sets before finally being downed for the Lord Jeff's first score. Day perhaps won the closest match taking two straight after dropping the first. Day and Hinck easily won the first doubles from Libson and Hadley of Amherst.

Two stiff meets face the Varsity men this week-end. Dartmouth's racquet wielders will play the team here on the Oakley courts this afternoon while the Boston College aggregation will try their luck on the same courts tomorrow.

Technology's second varsity did not fare so well in their meet Wednesday afternoon with the Harvard seconds. The match resulted in a complete whitewashing by the Harvard men. The team hopes to make up this when it meets Bates College here this afternoon and Andover at Andover tomorrow. The Harvard freshmen handed the frosh team the same treatment which will also have a chance to be made up at Andover.

Varsity score: Hinck (M. I. T.) defeated Libson (Amherst) 6-1, 6-1. Hadley (Amherst) defeated Kononoff (M. I. T.) 8-6, 2-6, 8-6. Kuki (M. I. T.) defeated Wyckoff (Amherst) 6-1, 3-6, 6-1. Day (M. I. T.) defeated Richardson (Amherst) 6-6, 6-4, 6-4.

Doubles: Hinck and Day (M. I. T.) defeated Libson and Hadley 6-2, 6-1. Bird and Freshman (Amherst) defeated Kononoff and Kuki. Total: M. I. T. 4, Amherst 2.

YOUR HOUSE

May throw the meanest parties of any of the fraternities, but in between times you have to have a little relaxation from the books, too. That's where a big evening at the Brunswick Egyptian Room fits in to perfection. And it's just across the river.

Musio by Leo Reisman and his orchestra
L. C. PRIOR, Pres. and Man. Dir.
BRUNSWICK EGYPTIAN ROOM

Four Races on Schedule For Tomorrow's Regatta With Harvard and Penn

(Continued from Page 1)

showing against the Varsity on Tuesday proved.

Again on Wednesday the numerous crew enthusiasts who lined the banks of the Charles River saw a very closely contested race when the Sophomore crew defeated the 150-pound freshman by just about two feet in the annual Richards Cup Race. No other class crews were entered in the competition. The Sophomores took the lead at the start and were three-quarters of a length ahead at the Harvard Bridge. About halfway between the bridge and the finish line of the mile course the freshmen started a sprint that carried their prow about a foot ahead of the Soph's bow. In this race, as in the 150-pound varsity race with Princeton, the last stroke made the difference between victory and defeat. The second year men were able to put enough force into their last stroke to nose out the frosh by the extremely small margin of two feet. The Richards Cup medals will be distributed to the members of the winning crew at the crew banquet.

The lineups were as follows:
Sophomores—Bow, Giles; 2, Farmer; 3, Walkler; 4, Biscoe; 5, Turner; 6, Wolf; 7, Bourne; stroke, Carr; coxswain, Booth.
Freshmen—Bow, Sherman; 2, Arnold; 3, Tarr; 4, Harris; 5, Brady; 6, Luykx; 7, MacKusick; stroke, Nason; coxswain, Twarogowski.

BEAVERS TROUNCE CONN. AGGIES, 9-5

Overcome Visitor's Early Lead With Crushing Attack in Final Inning

Connecticut Agricultural College went down to defeat at the hands of the Beaver baseball team in a game yesterday afternoon which was featured by the clever placing of the Engineers' hits. Rarely were the farmers able to touch a ball in the infield since the great majority of the singles were Texas leaguers and the longer hits entirely out of reach. Rhinehart with a triple, two doubles and a single in four times at bat was the outstanding performer with the stick. Captain Crandall with nearly as perfect a performance was able to get around the bases in easier style and thereby scored 2 runs.

Allen pitched the entire game and did remarkably well. The blue team was unable to find him for anything but slow grounders except in infrequent intervals, and on all occasions the Beaver infield played air-tight ball. Not an error was recorded against them. This gave the new Engineer pitcher a good opportunity to exert his greatest skill, a fact of which he took every advantage. It had been the expectation of Coach Silva to use several pitchers during the contest in order not to wear down their reserve but it was unnecessary to do so yesterday. Allen weathered the storm from a powerful team with seeming ease and made two apparently impossible assists from two line drives at the mound. He was particularly noteworthy in that he has only played with the team during the past week.

Team play accounts for the victory

of the Beavers for in the last analysis they did not play better ball than they are accustomed to. Crandall's home run and triples by Rhinehart and Cullinan materially aided the scoring.

The summary:

Beavers

HERE ARE 10 WAYS YOU CAN USE DUCO THIS WEEK END

It dries quickly and is easily applied!

<p>THIS afternoon paint the bed in one of the smart new pastel shades of Duco—you can do it in an hour or two—it dries so quickly. You can sleep in it the same night.</p>	<p>SMART decorators have shown how Duco can be used in artistically decorating lampshades and dozens of other small articles. Duco is so easy to apply, dries quickly, and is lots of fun to use.</p>
<p>GIVE Baby's coach a new coat of Ivory Duco—it will look like new, and you'll be proud to wheel Baby in it! Brush Duco on while Baby is taking her nap and take Baby out in it after lunch!</p>	<p>GIVE the family bus a coat of Duco! It will improve its appearance. Finish it with Duco this afternoon and take the family out riding in it the same evening.</p>
<p>FRESHEN up the bathroom shelves with Duco—it takes but a few minutes! And Duco dries so quickly—a specially great advantage for use on bathroom fixtures.</p>	<p>DO THE bookshelves! Paint them with Duco after supper, and put the books all back before you go to bed! And remember, Duco is washable! When the shelves get dusty, simply sponge them clean again.</p>
<p>BABY'S toys—and what rough use they get!—can be effectively restored in a few minutes with Duco! And Duco colors are so bright and gay that Baby will think he has new toys!</p>	<p>MAKE beautiful vases yourself! Glassware and crockery can be given wonderful decorative effects by the use of one or more Duco colors. You simply pour the color on, and it spreads out in the most beautiful patterns!</p>
<p>PAINT Dad's favorite chair with Duco—see how much oftener he'll sit in it! Many women buy unpainted chairs and then paint them with Duco to match their curtains and rugs. And how much can be saved that way!</p>	<p>FINISH the floor with Duco in a stained effect (which does the work of both stain and varnish). Do it this evening and you can walk on it tomorrow morning—think of the saving in time and temper!</p>

THERE are simply no end of ways that Duco can make your home more attractive and colorful. Even if you have never had a paint brush in your hand before, you'll enjoy using Duco! Ask one of your friends who has used it!

Odds Now 100 To 1 For THE TECH In Slaughter Of t. e. n.

Battle This Afternoon Will Bury Hopes Of Scientific Fakers For All Time

John Middleberg and his sensational t. e. n. hitless wonders will once again take the field against the powerful nine of THE TECH when these two teams clash in a battle to the death this afternoon on Tech field. Odds have shifted slightly since the game of last week. Instead of being a 25-1 shortender, the opponents of THE TECH are now 100-1 favorites to lose, and each hour increases this ratio.

THE TECH will start the same team that toyed with t. e. n. several days ago. Their opponents have a batting order just as bad if not worse than their earlier one. Throughout the week they have practised earnestly and hopefully but to no avail. Third base remained an unreachable goal to the entire squad. Wally Ross, who, it is rumored, has been secretly coaching the staff has given up in disgust. The outfit completed their last workout yesterday afternoon, which was in the form of broadcasting their monthly crime.

Latest reports from the weather bureau point to the fact that the Middleberg clan will not be aided by the rain. In the batting practise last week, it will be remembered that when THE TECH was leading 11-0 in the second inning comrade Pluvius stepped in at the intercession of t. e. n. and stopped the game. Only an earthquake or an overflow of the Charles can aid them now.

t. e. n. seems to have gained more confidence since the last battle, for over their fake broadcasting station, somehow they have got the distorted idea that they might have a chance in the coming slaughter. Such is very far from the case, however, against the powerful infield and the agile outfield of THE TECH, not to mention the sluggers represented on the staff of the newsies, they haven't a dog's chance.

TABLE RESERVATIONS FOR PROM END TODAY

Graduation Gowns May Be Obtained at Cooperative Society

Seniors who wish to sit with their friends at the Prom Supper will have their last chance to make arrangements to do so in the Main Lobby today from 11 till 2 o'clock. Those who fail to reserve places will be assigned to certain tables by the committee in charge, and will not under any consideration be allowed to shift their places because of the trouble it would cause.

These tables, which will be placed around the main ballroom and foyer of the Copley-Plaza Hotel, will each accommodate five couples. It has been suggested that those who are planning to attend the affair make up parties of five couples each and sign for a whole table.

Senior caps and gowns, which will be worn on Graduation, Class Day, and at the Baccalaureate Sermon, may now be obtained at the Co-operative Society. Gowns are on hand for Bachelor's, Master's, and Doctor's degrees, and may be either purchased or rented, as the student desires.

FROSH TRACK TEAM TO MEET NEW HAMPSHIRE

Tomorrow afternoon the freshman track team will conclude its track season with a meet at New Hampshire University. Although the strength of the New Hampshire team is unknown, the yearlings hope to wind up the season with a victory.

Cohen who won both the hundred and two twenty-yard dashes in the Andover meet should do well in these races. Steele, in the high jump is expected to be well up in the fight for first place with Ross also a possible scorer for the Cardinal and Gray. Ladd in the quarter-mile and Herbert in the mile are consistently good performers and will probably add substantially to the Technology score. In the javelin throw Whitworth will be the best bet for the frosh. He has been credited with some very good throws in previous meets.

With Prescott, Dunlap, and Roberts entered in the half mile the yearlings should make a bid for points in this event. Boynton in the discus, Crotty and Houston in the hammer throw, and Rogers in the shotput will probably add to the Cardinal and Gray score. A squad of 22 men will make the trip, leaving North Station at nine o'clock Saturday morning.

CHRISTIAN SCIENCE SOCIETY

There will be a business meeting of the Christian Science Society for the election of officers in Room 4-132 at 5:00 today.

CATHOLIC CLUB

There will be an important meeting of the retiring and newly elected officers of the Technology Catholic Club at 5 o'clock today in room 2-151.

WILL DEMONSTRATE MILLION VOLT ARC

Home of Artificial Lightning To Be Inspected

Four out of the nine student papers to be delivered at the Student Convention of the American Institute of Electrical Engineers were prepared by students at M. I. T. They will be presented at the Technical Session, May 27, at 2 P. M., in the Maplewood Hotel, Pittsfield, Massachusetts.

Artificial lightning demonstrations and a million volt three-phase arc will be viewed at the inspection trip to the transformer plant of the General Electric Company Thursday afternoon, the first event of the Student Convention. In the evening will be the banquet for all delegates and members, to be followed by novel entertainment.

Friday morning will be devoted to a regular Technical Session and in the afternoon will be the Student Session. M. I. T. speakers are J. Elwood Tweeddale, Edward E. Mott, George H. Rockwood, and Frank Massa, all of the class of 1927. In the evening, Professor Vladimir Karapetoff of Cornell will give a musical recital.

Rooms may be reserved by writing Mr. C. H. Kline, secretary of Pittsfield Branch, A. I. E. E. He states that rooms may be obtained at \$1.50 up.

Editors of a school publication at the University of Georgia have been ordered to withdraw from the school because they had been guilty of a case of lese majeste. They had in the paper ventured to criticize policies of the university, condemn professors and they even dared charge the athletes were brought with scholarships.

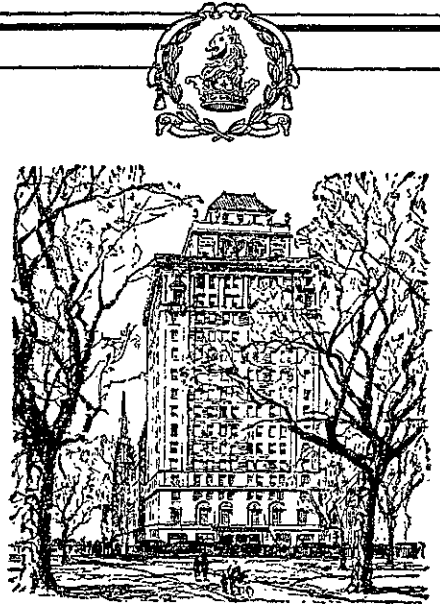

There will be a meeting of the Fencers' Club in North Hall Friday at 5:30. All members are requested to be present.

MONEY

A sum of money was found yesterday in the bowling alleys in Walker Memorial. Owner may recover same by giving a description of the amount to Eddie Pung.

JAIL WORK

Men are wanted to teach English and Arithmetic in the Middlesex County jail from 2:50 to 3:50 o'clock every day except Thursday. Apply at the T. C. A. office.

Opening, Wednesday, May 18th

Me and the joy-friend... Prince Albert

WHEN my father was in college, "Put that in your pipe and smoke it!" was considered snappy conversation. I'm ready to take this old line literally when the talk centers around Prince Albert. Because P. A. makes two of what I like in a pipe.

All wise-cracking aside, P. A. is the money when it comes to deep-down satisfaction in a smoke. It's got everything! Cool as the trail of the ice-man across the kitchen. Sweet as vacation. Fragrant as a pine forest.

Think up your own similes. You'll write them all in the column headed "Superlative Degree" when you learn the joys of a jimmy-pipe and Prince Albert. If you don't know this grand old smoke, come around to my room and I'll give you a load.

PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.
